

SMART BUILDING LIGHTING - WiFi

Proven. Energy Efficient. Sustainable

Lighting has been known to affect people's moods, motivation, well-being, and productivity. With people spending most of their adult life indoors, lighting is playing an increasingly important role in our day to day lives. Human Centric Lighting solutions can support circadian rhythm, enhance concentration, and prevent sleeping disorders.

VIoT offers Smart LED Drivers with WiFi connectivity using which the luminosity can be manipulated to range from warm white to cool white light, and granular controls allow for dimmable intensity from 0-100%.

CONNECT THE SMART WIFI DRIVER WITH LED FIXTURES & ACHIEVE SEAMLESS CONTROL & MONITORING

KEY FEATURES

| | | |
|---------------------------------|---------------------------|--------------------|
| Remote On, Off, Dimming Control | CCT Color Tuning | Energy Measurement |
| Fault Monitoring | 20 - 45W LED Lights | Linear Form Factor |
| Box Form Factor | Standalone Smart Solution | Plug & Use Option |

Smart Driver - Linear
(20-45W)

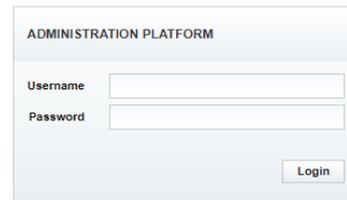

Smart Driver - Box
(20-45W)

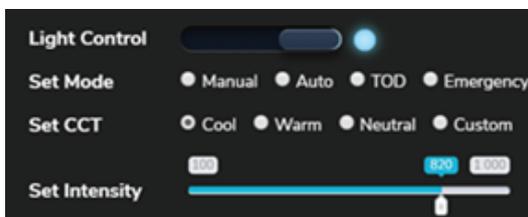

WHITE-LABEL HARDWARE & SOFTWARE OFFERING
FOR LIGHTING MANUFACTURERS & SYSTEM INTEGRATORS

SOFTWARE

- Individual & group control of lights
- Monitor faults and alerts
- Energy consumption reports
- Web & Mobile application offered
- The option of cloud or on-premise deployment
- Customization of dashboard offered

Control Options

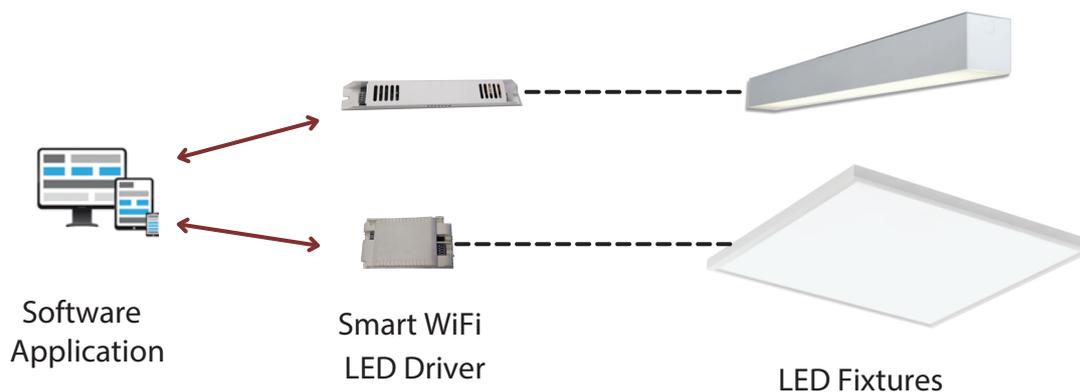

Preset Tuning for Human Centric Lighting

APPLICATION AREAS

- Lighting upgrades for medium-scale buildings with office spaces & commercial operations
- Suitable for single building lighting projects with 200-300nos

WE'RE LOOKING FOR PARTNERS

- Lighting Manufacturers
- System Integrators
- Building Automation Partners
